Atty. Docket: IP 6037

IN THE CLAIMS:

Please cancel claims 7-14 and 25-33, and amend claim 1, 4, 5, 15 and 34 to read as follows:

À2

- 1. (Amended) An ink receiving medium comprising a microporous polymeric film, said microporous polymeric film [consisting of a polymer] comprising a hydrophilic blend of a hydrophobic polymeric material and a hydrophilic polymer melt additive and not comprising filler particles.
- 4. (Amended) The ink receiving medium as recited in claim 1, wherein [the amount of] said hydrophilic polymer melt additive [is in the range of 1-12 wt.%] comprises an organic fluorochemical.
- 5. (Amended) The ink receiving medium as recited in claim 1, wherein said [polymer] <u>hydrophobic polymeric material</u> is polypropylene.
 - 15. (Amended) An ink receiving medium comprising:
- a microporous polymeric film that does not include filler particles; and
- a microparticle coating applied on one side of said $\ensuremath{\operatorname{film}}$,

wherein said coating comprises colloidal inorganic particles and a polymeric binder, the weight percent of colloidal inorganic particles being greater than the weight percent of polymeric binder.

A5

34. (Amended) An ink receiving medium comprising a microporous stretched polymeric film without filler particles and a colloidal coating applied on at least one side of said microporous stretched polymeric film, wherein said colloidal coating comprises submicron inorganic pigment particles embedded in a binder.
